DETAILED ACTION

Allowable Subject Matter

1. Claims 1, 3 and 5-10 are allowed.
2. The following is an examiner's statement of reasons for allowance: The closest prior art of record is EP 925,776, as relied upon in the final office action. It discloses the preparation of perfume-containing polymers by polymerization of the recited monomers in the presence of perfume. This is disclosed as critical to the formation of "molecularly imprinted" polymers. A control polymer was prepared by conducting a polymerization, followed by mixing with perfume to allow absorption of the perfume into the polymer, followed by addition to a softening base, as presently recited. However, the polymer used for the control is not the polymer presently recited. Accordingly, the EP is not a 102 reference. As the reference clearly teaches the advantages of forming the polymer in the presence of the perfume, which is different from the method presently recited, it would not be obvious to form the polymer and then to mix it with perfume in a separate step prior to adding the impregnated polymer to a softening base.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
